9. STATEMENT (Continued)

I wish to clarify that in previous years lab has performed correlation studies or established normal reference ranges and other quality control/quality assurance exercises. During those times we would sometimes ask for blood donations. Additionally 10 plus years ago, preventive medicine or occupational health would hold cholesterol screenings. there were also instruments in that area years ago that required correlation, QC etc. Back in ~~the 1990s~~ 1994 or '95 those instruments were removed due to JCAMO standards.

To clarify the eligibility check, lab does not register patients in DEERS or CHCS. If a patient presents with orders or has orders in CHCS, we go to a lab menu either L60 or OLG to order the tests or accession the test. If the patient wasn't found in CHCS, we would have him or her go to patient administration. Patient administration is one area who does register patients in CHCS.
